Hotel Management System Package

(Resto + Room Service)

1- Place Daily Order Receipt

Process daily food and service orders for both restaurant and room service operations.

2- POS Admin / Cashier / Waiter

Assign user roles and manage permissions for smooth operation between admin, cashier, and waiters.

3- Manage Waiting Orders

Handle pending room or dining orders efficiently to avoid service delays.

4- Table Management

Organize dining tables, reservations, and guest seating for restaurant areas.

5- Room Service Management

Record, track, and deliver room service requests directly from the POS.

6- Booking Management

Manage hotel room bookings, availability, and check-in/check-out processes in real time.

7- Manage Customer Loyalty

Maintain guest profiles and offer loyalty or membership rewards for frequent visitors.

8- Advanced Kitchen Stock Management

Manage stock levels across kitchen and minibar items with automatic restock alerts.
